Experiment 4-B

Student Admission Enquiry Form Using Advanced Fields

Aim

To design and build a "Student Admission Enquiry Form" in Zoho Creator using the Advanced Fields available in the Form Builder.

Procedure

The source has no separate Procedure section. Its Workflow Summary is used as the procedure.

1. Applicant completes the existing basic-field sections.
2. Applicant selects their previous school using the School Name Lookup field, which auto-fills the board affiliation.
3. Sibling details are added as rows in the Sibling Details SubForm.
4. Applicant uploads mark sheets and optionally a self-introduction video and a statement-of-purpose audio clip.
5. Applicant indicates whether hostel accommodation is required; Application Fee Paid, Scholarship Eligibility, and computed Net Application Fee Payable are displayed.
6. Parent/Guardian reviews the Admission Process Guidelines and provides a Digital Signature.
7. On Submit, the system generates the Admission Enquiry ID, timestamps Enquiry Submitted On, and generates the QR Code.
8. The Admission Cell reviews the report, verifies mark sheets and school details, confirms the fee, and uses the QR code to retrieve the applicant's file during counselling.
