Experiment 8

User Management and Role-Based Access Control in Zoho Creator

Aim

To implement User Management and Role-Based Access Control in Zoho Creator to manage users, assign roles, and control access to application features and data based on the permissions granted to each role.

Procedure

1. Log in to Zoho Creator using the administrator (Super Admin) account.
2. Open the Users page from the Manage section in the left navigation pane.
3. Click Add User and enter the email addresses of the users to be invited. An invitation is sent to each user.
4. Check the Users list and confirm that each user appears with the correct name, email address, and status (Active or Pending).
5. Open the options menu (...) beside a user to view the available actions: Resend Invitation, Add to Application, Make as Admin, Deactivate, Edit Name, and Delete.
6. Use Deactivate on a user who should no longer have access, and confirm that the status changes to Inactive.
7. Use Add to Application to grant a user access to an application by selecting the application, the role, and the permission.
8. Open the user's details panel and verify the application, role, and permission assigned (for example, Student Admission 1 with the role CEO and the Read permission).
